Chewable Supplements

TENTORIUM® produces more than 200 types of food and cosmetic products:

Drone Brood Jelly - 180g

A natural product that TENTORIUM® has pioneered in use, is based on a unique ingredient - drone homogenate. A natural source of proteins helps increase physical activity, stimulate the production of sex hormones and harmonize sexual relationships. Drone brood jelly has a positive effect on libido and sexual vigor helps balance hormones in the human body.

Ingredients: Drone brood (homogenate).

Directions for use: Take 1 teaspoon of the chewable 2 times a day (in the morning and in the afternoon) 30 minutes before meals.

Tentorium Plus - 300g

This is a basic chewable used as a supplement to the wholesome diet of the entire family. The basis of the chewable is top-quality bee pollen. Thanks to specific enzymes of pollen pellets – DNA-reducing nucleases – the chewable is beneficial to everyone: it contributes to children's physical growth, helps adults restore vital forces, and strengthens the immune system and increases resistance of the body to adverse environmental factors. Tentorium Plus chewable contains all basic vitamins, micronutrients, enzymes, nucleic acids and amino acids.

Ingredients: Pollen (pellets), propolis extract, beeswax.

Directions for use: Take 1 teaspoon of the chewable 2 times a day before noon 30 minutes before meals.

KHLEBINA - 300g

The chewable based on bee bread and honey has antisclerotic effect, and restores function of the cardiovascular, digestive and endocrine systems. This is a purpose-specific and clinically approved nutrition product developed for athletes.

Ingredients: Beebread, honey, beeswax.

Directions for use: Take 4 chewables 3 times a day. To gain weight, take them 30 minutes before meals. To maintain weight, take them right after meals. Expert comment: The chewable is recommended as a natural component of a diet intended to regulate gut microflora and function of the liver, thyroid gland, kidneys, lungs, heart, and prostate gland, and their regeneration.

Royal Jelly with Dry Honey powder

One capsule of Royal jelly with dried honey contains the equivalent of 300 mg of native royal jelly. The main focus of the healing qualities of royal jelly is the activation and acceleration of the processes of regeneration and rejuvenation of all cells in the body, as well as the normalization of metabolic processes and hormonal balance.

Ingredients: dry honey (fructose, glucose, natural honey), lyophilized royal jelly.

Food Balms

TENTORIUM® produces more than 200 types of food and cosmetic products:

Apihit - 15ml / 100ml

This clinically tested natural complex is a unique combination of chitosan and Siberian fir extract. It is a powerful natural sorbent capable of binding and removing toxins from the body. ApiHit Balm regulates blood pH and cholesterol levels, purifies lymph, normalizes gut microflora, improves microcirculation, relieves angiosperms of tiniest capillaries especially, and facilitates wound healing. Fir CO₂-extract is rich in vitamin C and has antibacterial and antiviral effects. It also contains essential anthocyanins and flavonoids. ApiHit is a specialty food product for athletes.

Ingredients: Low molecular weight chitosan, water fraction of Siberian fir CO₂-extract

Directions for use: Take 7 drops of ApiHit Balm 3 times a day 30 minutes before meals.

A-P-V 15ml / 200ml

A-P-V is a propolis aqueous extract made of water and natural pure propolis that has antimicrobial, antifungal and antiviral effects. A unique technology of extraction of cinnamic acids from propolis is used at our factory. Balm has a distinct antiviral effect and it helps fight influenza, Herpes simplex and hepatitis viruses, helps the body resist pathogenic agents of gastric and duodenal ulcer, helps cure cold when its first symptoms appear, and protects the human body from microbial invasion. Due to exceptional antimicrobial properties of propolis it perfectly suits for both, internal and external use. As for external use, the product is very helpful in fighting dental and gums inflammations, also in healing bruises and cuts. Natural multi-purpose products do not contain alcohol and are absolutely safe for adults and children, pregnant women and drivers.

Ingredients: Natural propolis, ionized purified water

Directions for use: Take 1 dessert spoon of the balm 3 times a day 20 minutes before meals; or External Use: in the form of applications.

Acile - 100ml

Mumio is a legendary “mountain oil” that facilitates metabolism, and Siberian ginseng is a natural adaptogen, i.e. an agent increasing resistance of the human body to adverse environmental factors. Excellent product that helps your immune system remain strong and healthy, helps recover after surgeries or bone fractures. The balm is recommended for kids and elderly people.

Ingredients: Mumio, Siberian ginseng extract

Directions for use: Dissolve one teaspoon of the balm concentrate in 200 ml of warm water and take it 30 minutes before meals once a day before noon. Expert comment: Specialty food product for athletes, clinically tested

Khinasi - 200ml

The balm contains propolis and herbal components, which normalize water and salt balance and metabolic processes, and improves joint mobility. In traditional and alternative medicine balm components are used for prevention of cardiovascular and kidney diseases.

Ingredients: Propolis, birch leaf, bearberry, immortelle flowers, St. John’s wort, Equisetum arvense, rose hips, comarum root, basil extracts

Directions for use: Take ½ to 2 teaspoons of the balm 2 times a day before noon. The balm is most efficient when it is used in combination with Tentorium chewable and massage with Tentorium cream.

Revitalizing Creams

TENTORIUM® produces more than 200 types of food and cosmetic products:

Extreme Cream - 15ml

The cream with honey bee venom and Badiaga sponge is intended for treating consequences of injuries, sprains, and minor muscle and connective tissue injuries. Thanks to its immediate effect, the cream is a perfect first-aid remedy for injuries during sports and outdoor activities. The cream was tested by fishermen and hunters in extreme conditions. Badiaga and bee venom help to quickly get rid of bruises, swelling and pain.

Ingredients: bee venom, beeswax, Badiaga sponge, chlorophyll-carotene pine needle paste, horse chestnut and calendula extracts.

Directions for use: Apply a small amount of the cream to damaged skin areas (bruises, hematomas, or sprain). Do not apply to wounds.

Tentorium Cream - 100ml

This classic multipurpose cream with bee venom helps recover after physical stress, relieving muscle pain. It also has a general health-promoting effect on the human body. The cream softens and nourishes the skin and perfect for therapeutic, health-improving and sports massage. The powerful effect is ensured by one of the active components – honey bee venom or apitoxin. Honey bee venom is the most powerful and efficient bee product. Even in minor concentrations it has a strong effect on the human body. When combined with other most beneficial bee products, bee venom in small amounts improves blood circulation and vital tonus. Massage with Tentorium Cream relieves muscle fatigue and pain, restores joint mobility and facilitates muscle rehabilitation after intensive physical exercises.

Ingredients: Propolis extract, honey bee venom, beeswax, horseradish extract, linden blossom CO2-extract, camphor oil.

Directions for use: The cream is recommended for use in massage procedures.

Chilidonia Ovotelle - 50ml

CHILIDONIA OVOTELLE Thanks to its ingredients, this cream is efficient all year round. In winter it helps to cure windburns; in summer it moisturizes the skin; and in spring and autumn it prevents acute episodes of skin diseases. The component combination facilitates healing of cracks in the skin, psoriasis and diathesis. The patented Ovotelle ingredient ensures softness of the skin and maximum efficiency of the cream.

Ingredients: Ovotelle (oil from the yolks of quail eggs), pine pitch, beeswax, propolis extract, honey.

Directions for use: Apply the cream to damaged skin areas for 3 hours. Remove remaining cream with water or a paper towel.

Rhino-factor - 15ml

Since the very moment of its release Rhino-Factor Cream has been a best selling product and a leader of TENTORIUM® product range. The reason is obvious – this natural cream protects the nasal mucosa and removes nasal congestion. The effect of cream components is based on powerful reflex stimulation of the nasal mucosa which results in reduction of excessive mucus secretion. The cream relieves nasal mucosal swelling & pain, and strengthens vascular walls. Its components have distinct bactericidal and antiviral effects.

Ingredients: Beeswax, propolis extract, eucalyptus essential oil, clove oil, mint oil.

Directions for use: Apply a small amount of the cream into each nasal passage during period of seasonal acute respiratory viral infections.

Tentorium Ultra - 50ml

Since the very moment of its release, it has been a best selling product and a leader of TENTORIUM® product range. The reason is obvious – this natural cream protects the nasal mucosa and removes nasal congestion. The effect of cream components is based on powerful reflex stimulation of the nasal mucosa which results in reduction of excessive mucus secretion. The cream relieves nasal mucosal swelling and pain, and strengthens vascular walls. Cream components have distinct bactericidal and antiviral effects.

Ingredients: Beeswax, propolis extract, eucalyptus essential oil, clove oil, mint oil.

Directions for use: Apply a small amount of the cream into each nasal passage during period of seasonal acute respiratory viral infections.

Active Food Supplements

TENTORIUM® produces more than 200 types of food and cosmetic products:

Royal Jelly With Genistein In Dark Chocolate - 30g

Royal jelly (300 mg in one piece!) and genistein (a vegetable analog of the female hormone) are unique substances supporting women during periods of hormonal changes and protecting them against osteoporosis.

Ingredients: Royal jelly, genistein, ground cocoa, cocoa butter.

Directions for use: Adults: Take one piece of chocolate a day during 4 weeks.

Ergo Calcium - 126g

The wholesome complex strengthens bones and teeth, maintains normal function of the heart, increases muscle tone, and prevents fragility of hair and nails. The unique feature of this product is natural calcium contained in it. We derive calcium from eggs of brood quails raised at TENTORIUM® agricultural facilities.

Ingredients: Quail egg shell, calcium phosphate, honey, zinc citrate, magnesium carbonate, vitamin D3.

Directions for use: Adults: Take 1 pack (4.5 grams) of the granules a day with meals during 4 weeks.

Extra Betulin - 7.5g

This biologically active dietary supplement is used for prevention of cardiovascular diseases. It reduces risk of atherosclerotic plaque formation which might result in a heart attack. High bioflavonoid content in propolis provides its cardioprotective and anti-atherosclerotic effects.

Ingredients: Betulin, propolis, honey.

Directions for use: Take 2 dragées a day with meals during 4 weeks

Propolis C Immuno - 150g

PROPOLIS C Drink concentrate powder. A portion of the product provides 40% of the daily norm of flavones and flavonols, and 16% of the daily norm of vitamin C. Propolis is a natural immunomodulator that contributes to preventing flu. The efficient combination of propolis and vitamin C facilitates recovery after illness, saturates the body with vitamins, and reduces effects of adverse environmental factors.

Ingredients: Propolis extract, pectin, ascorbic acid (vitamin C).

Directions for use: Pour 100 ml of hot water over 1 level teaspoon of the product and stir it over thoroughly. Adults: Take the cocktail once a day with meals during 4-6 weeks.

Bilberry Pollen - 180g

The dragée enriched with bilberries, pollen pellets, and lutein keeps the eyes healthy. Expert comment: The dragée contains an anthocyanin and micronutrient complex. The pollen used in the product contains carotenoids, amino acids and vitamins. All these ingredients improve function of the eyes in everyday overstresses.

Ingredients: Bilberries, pollen (pellets), propolis, flaxseed flour, lutein, beta-carotene, vitamins A, C and E, zinc, beeswax.

Directions for use: 1 teaspoon 3 times a day 30 minutes before meals in 3-4 week cycles. Awardee of the "Russia's Top-100 Goods" All-Russian Quality Competition.

Honey and Honey Compositions

TENTORIUM® produces more than 200 types of food and cosmetic products:

Tentorium Wellness Active Complex - 100g

When taken regularly in small amounts, the honey blend improves blood circulation and composition, helps maintain micronutrient level, increases working capability, and stimulates body defenses.

Ingredients: Honey, beebread, propolis water extract, concentrated propolis extract, pollen (pellets), royal jelly, chitosan, pine nuts, mumio, Siberian ginseng extract.

Directions for use: The active complex is ideal as a supplement to basic diet of people who are under physical or mental stress

Angelica Honey - 230g

Gold Medal awarded by the "Apimondia" International Federation of Beekeepers' Associations in 2017. Angelica honey is a rather rare sort of honey produced from nectar of angelica, a herbaceous plant. The color is dark brown with red or greenish tint. It has malt and caramel flavour with delicate, slightly pronounced bitterness. Angelica honey has prominent antimicrobial and probiotic properties.

Siberian Linden Island - 230g

Silver Medal awarded by the "Apimondia" International Federation of Beekeeping Associations in 2019. 'Siberian Linden Island' honey is a limited edition honey. The honey is collected in the preserved area of Siberia, "Kuzeudevsky linden island" - an ecologically safe zone where relict Siberian lindens and wild Angelica grow. A rare combination of Angelica and Siberian linden, preserved since the pre glacial period, gives honey a distinctive taste and aroma and makes it truly unique. This elite relict honey from taiga areas of Siberia was served in the imperial family. When packed, honey fully retains its taste and properties thanks to the low-impact technology applied at the factory, and remains a completely natural and healthy product.

Wild-hive Honey - 230g

The honey of our ancestors in its original form contains all the palette of bee products. You will find pieces of honeycombs taken from wild hives in this honey. The honey is enriched with nutritious and healthy bee products: pollen, bee bread, beeswax, propolis, royal jelly and drone brood that promote health.

Buckwheat Honey - 230g

The product has a very pleasant aroma and bright specific flavor. The colour is from dark yellow to red. Such wide colour palette is explained by the fact that there is enormous amount of ferrum in the content. Also it contains such health-giving and irreplaceable micro-elements as potassium (K), phosphorus (P), magnesium (Mg), calcium (Ca), ferrum (Fe), etc. Buckwheat honey is famous for its antiseptic properties. With the help of it people have been healing purulent inflammations, wounds, skin disease, etc. In 60-70s oncologists from Japan conducted experiments which showed that the buckwheat "liquid gold" can help to protect from radiation releases. Wonderful results were obtained also in treatment of anemia, light forms of diabetes, vitamin deficiency, rheumatism, scarlet fever, etc. It is worth mentioning that buckwheat honey contains large amounts of proteins and ferrum.

Sport Nutrition

TENTORIUM® produces more than 200 types of food and cosmetic products:

VITAL FORCE PLUS (Honey with pollen (pellets), horseradish extract, concentrated propolis extract) - 400g

This energy boosting product increases endorphin production and promotes physical and emotional health. The product was tested during extreme river rafting in Northern Ural. Not recommended before going to sleep!

Ingredients: Honey, pollen (pellets), horseradish extract, concentrated propolis extract

Directions for use: Take 1-2 teaspoons of the product before noon

Gold Bar Api-snack - 26g X 30

This product is Russia's first api-snack containing all known gifts of nature found in a beehive.

Positive effects of this natural complex of vitamins and micronutrients contained in bee products and herbal components are the following:

- Protects the body against stress – it improves stress resistance, and provides additional support during infectious epidemics and seasonal immune deficiency;
- Reduces the risk of a heart attack and stroke;
- Helps the body fully recover during sleep when under stress;
- Gives energy boost for the whole day. Clinically proven product.

Ingredients: Beebread, propolis, royal jelly, pollen, pine nuts, sunflower seeds, mumio, Siberian ginseng, flaxseed, chitosan, honey
Directions for use: Divide 1 pack of "Gold Bar" into two equal parts and take one part in the morning and the other one in at lunchtime.

Beauty Cosmetics

TENTORIUM® produces more than 200 types of food and cosmetic products:

Micellar Water - 200ml

The micellar water is a new generation cleansing product. It is created for gentle removal of make-up and other impurities from the skin of the face, lips and sensitive eye-contour area. It delicately cleanses and moisturizes the skin and your skin feels clean, soft and comfortable. Thanks to natural pomegranate and pumpkin enzymes and bee moth extract, the micellar water ensures excellent exfoliation of epithelial cells. Propolis extract contained in the product has anti-inflammatory effect and soothes irritated skin.

Active Ingredients: Propolis and bee moth extracts, pomegranate and pumpkin enzymes, water-soluble olive oil, D-panthenol.

Directions for use: Soak a cotton pad with micellar water as required. Swipe across the skin of the face and lips with gentle motions. To remove makeup, put the cotton pad on the closed eyes and remove makeup gently. The product is safe to remove waterproof makeup.

Face Serum - 30ml

Scientific research in the field of epigenetics allowed the creation of an exclusive component for anti-age cosmetic products. This ingredient, called Royal Epigen, is based on royal jelly, which effectively fights age-related skin changes and regenerates and rejuvenates the skin. When used regularly, the facial serum smoothes out wrinkles, makes the facial skin significantly firmer and more elastic, and slows ageing processes.

Active ingredients: bee venom, royal jelly peptide, hyaluronic acid, Shea butter, vitamin E (tocopherol).

Directions for use: Apply serum along massage lines on clean skin of the face avoiding eye area, and distribute it evenly. The product should be used in the morning and in the evening.

Eye Serum - 15ml

The serum instantly smoothes out small wrinkles in the corners of the eyes, as if they are erased after "beauty injections". The serum evens out the skin intensively and, at the same time keeps a natural look on the face. Accumulative effect of the serum becomes obvious if the product is used regularly. And it becomes even more effective when used in combination with other Anti-Age beauty products containing bee venom, peptides and herbal extracts.

The effects of this serum active component are clinically proven. The combination of bee venom, royal jelly peptide and a cone snail peptide helps moisturize and rejuvenate the delicate eye skin area and contributes to removal of dark circles under the eyes. The cone snail peptide helps to relax the muscle without temporarily paralyzing it, like Botox injections do, which allows you to get a natural result, smooth out wrinkles and keep natural facial expression.

Active ingredients: bee venom, royal jelly peptide, cone snail peptide, hyaluronic acid, elder blossom extract, Shea butter

Directions for use: Apply 1 serum drop to clean skin around the eyes and distribute it evenly in gentle motions. The product should be used in the morning and in the evening

Repair Complex Cream - 50ml

A unique combination of bee venom, royal jelly peptide and exotic plant extracts gives a significant anti-aging effect. The effect produced by the components of the cream reduces pigmentation of mature skin, evens out its natural complexion, smoothes and whitens the skin without affecting hormonal mechanisms, especially during menopause. The cream promotes synthesis of collagen, increases skin firmness and elasticity, activates the processes of cell renewal and skin rejuvenation. Regular use of the product significantly reduces the depth of the nasolabial wrinkles, tightens facial contours, reduces the effect of saggy skin, and helps women maintain their natural beauty at any age. The product does not contain perfume agents, aggressive preservatives or parabens

Active ingredients: bee venom, royal jelly peptide, hyaluronic acid; Arjuna bark, Morinda citrifolia seed, white water lily, aloe extracts; sesame, macadamia, argan, wheat germ oils; panthenol

Directions for use: Apply cream along massage lines on dry and clean skin of the face. The product is recommended for everyday use.

Face Cleansing Foam - 170ml

Light facial foam with a unique natural component, bee moth extract, gently removes makeup, cleanses and moisturizes the skin. It doesn't leave an oily layer on the skin, and contributes to processes of skin regeneration and renewal of skin cells.

Active ingredients: Propolis extract, bee moth extract, honey, lactic acid, wheat proteins

Directions for use: Apply foam in circular motions to wet skin of the face and neck. Remove any remaining foam with a cotton pad or a sponge. The product is recommended for everyday use.

Body and Face Care

TENTORIUM® produces more than 200 types of food and cosmetic products:

Hydrophilic Bath Oil - 195ml

This unique product has been created for relaxation and body care. It incorporates the best that nature can give us. It contains pollen and precious essential oils that nourish and take gentle care of your skin. The oil ingredients saturate the skin with vitamins and make it velvety, silky-smooth, and tender, while restoring its elasticity and firmness. A bath with the hydrophilic oil will give you unbelievable pleasure and relaxation. Just a few drops applied to the body leave the oil with a unique scent. Active ingredients: Pollen extract; rose hip, poppy seed, sweet almond oils

Directions for use: Bath oil: Add some hydrophilic oil into warm water before taking a bath;

Body oil: Mix some oil drops with water and apply to clean skin;

Perfume: Apply some oil drops to biologically active points

Moisturizing Body Milk - 150ml

This gentle milk with its light texture softens and nourishes the skin perfectly. The product's well-balanced formula keeps the skin moisturized all day long. Ovotelle enhances the effect of preventing moisture loss, and vitamin E, the vitamin of youth, prevents oxidative stress in skin cells. Shea butter makes the skin look even better, and D-panthenol has a healing effect.

Active ingredients: Ovotelle, honey, D-panthenol, almond oil, Shea butter, vitamin E

Directions for use: Apply the milk to body skin and massage it into the skin gently until the milk soaks in.

Nail And Cuticle Oil - 45ml

Cuticle care is an important stage in the hand and nail care routine. TENTORIUM® Company created a new everyday use product for you for that purpose. The nail and cuticle oil helps strengthen the nail plate and take care of the cuticle, keeping it healthy and neat. Luxurious essential oils in combination with pollen, propolis and bee moth extracts soften and help remove coarse skin around the nail. At the same time the oil delivers nutrients to the nail growth plate and makes the nails grow faster and stronger. Ingredients: sunflower seed oil, macadamia oil, sweet almond oil, sesame oil, castor oil, wheat germ oil, sea buckthorn extract, calendula extract, pollen extract, propolis extract, vitamin E (tocopherol acetate), vitamin F (linoleic and linolenic acids), lecithin, butylhydroxytoluene, beeswax extract, perfume composition.

Directions for use: Apply oil to the cuticle and nail plate using a stylus. Massage the area to rub oil into it during 1 to 2 minutes. Leave it for several minutes until all nutrients penetrate into the skin. Remove remaining oil with a paper towel, if necessary, and remove excessive cuticle carefully.

Intimate Care Gel - 200ml

After using this soft and gentle gel for intimate care you feel refreshed and clean without any dryness or irritation. Propolis extract this gel contains anti-inflammatory and antiseptic effects. Pure honey and herbal extracts moisturize and soften the skin maintaining its natural balance. Active ingredients: Honey, propolis extract; chamomile, horse chestnut, ginseng, rockweed extracts
Directions for use: The product is recommended for everyday use. Expert comment: Propolis, chamomile, rockweed, horse-chestnut and ginseng extracts have antiseptic effects on the most intimate parts of the body. This gel is guaranteed to be efficient!The product does not contain perfume agents, aggressive preservatives or parabens

Active ingredients: bee venom, royal jelly peptide, hyaluronic acid; Arjuna bark, Morinda citrifolia seed, white water lily, aloe extracts; sesame, macadamia, argan, wheat germ oils; panthenol

Directions for use: Apply cream along massage lines on dry and clean skin of the face. The product is recommended for everyday use.

Moisturizing Gel For Sensitive Skin Areas - 50ml

The recipe of this gel has been specifically developed for most tender parts of the body to ensure gentle and delicate care. The gel moisturizes the skin and relieves dryness and irritation. Propolis and chamomile extracts this gel contains have anti-inflammatory and antiseptic properties.

Active ingredients: Propolis extract, honey, chamomile extract, D-panthenol.

Directions for use: The product is recommended for everyday use. It is efficient during menopause and age-related hormonal changes, in case of post-natal (post-delivery) hormonal changes, and during recovery after antibiotic therapies.

Oral Care

TENTORIUM® produces more than 200 types of food and cosmetic products:

Apident Toothpaste - 100ml

This toothpaste contains pollen and propolis extracts. It provides sufficient hygiene of the oral cavity, and efficiently removes dental surface plaque from tooth enamel preventing caries and making your breath fresh.

Active ingredients: Propolis extract, pollen (pellets).

Directions for use: Squeeze out some toothpaste onto a toothbrush and brush your teeth during three minutes massaging the gums. Rinse your mouth. Brush your teeth at least twice a day

Mouthwash - 320ml

This unique formula with natural components has been developed to protect teeth against caries and to keep gums healthy. TENTORIUM® mouthwash with propolis and St. John's wort helps you to take care of your oral cavity and keep your breath fresh any time of the day. It is easy, convenient and safe to use. Propolis and St. John's wort extracts have strong antibacterial and anti-inflammatory effects, and regenerate soft tissues of the oral cavity.

Active ingredients: Propolis and St. John's wort extracts.

Directions for use: Rinse your mouth with TENTORIUM® mouthwash after each meal.

Gel For Gums With Bee Venom - 25ml

This new and unique gel for gum care with bee venom is a know-how of our Company. It has been created on the basis of scientific research. The product contains a combination of active ingredients that make your smile shine and prevent periodontal disease. Bee venom used in this gel improves microcirculation in the gums, relieves swelling, and restores affected mucosa. Propolis and herbal extracts promote healing of small wounds and injuries.

Active ingredients: bee venom, propolis extract; chamomile, calendula, common yarrow, sage herbal extracts; D-panthenol; chlorophyll-carotene pine needle paste.

Directions for use: Apply gel in a thin layer to the gums after brushing your teeth.

Chewing propolis wax with ginger (8 g)

A completely natural product for the protection of the oral cavity. Suitable for people of all ages.

With daily use, the product:

- Protects the oral cavity from pathogenic microbes, viruses and bacteria, effectively disinfects the oral cavity;
- Cleans teeth from plaque and food debris;
- Helps to strengthen the enamel, prevents the development of caries;
- Protects the gums from inflammation and bleeding;
- Facilitates the course of ENT diseases and upper respiratory tract;
- Improves the digestive tract;
- Strengthens local immunity;
- Reduces the urge to smoke;
- Freshens breath.

The product helps to produce saliva by enriching it with essential oils, flavonoids, bioflavones and cinnamic acids. In saliva, under the influence of enzymes, useful propolis and wax components directly enter the bloodstream, fully absorbed by the body. Hypoallergenic product. Safe to swallow. Does not contain sugar. It is not a drug.

To achieve the maximum healing effect, we recommend chewing at least twice a day for 10-15 minutes. During periods of viral infections, increase the consumption of the product.

Contraindications: individual intolerance to the components of the product

Expiration date: 9 months.

Why are the TENTORIUM® Products in so Demand?

TENTORIUM® products have an impeccable reputation. Many patents, lots of local and international medals and rewards, scientific research, millions of satisfied clients and grateful reviews is a clear confirmation of this.

The basis of the classic line are clinically proven recipes collected in many union republics by the State Committee for Science and Technology of the USSR. Modern products are created in alliance with leading scientists and institutes from Russia and abroad.

Innovative development is an undividable part of TENTORIUM® products production. Among them there is the scientific discovery of the ability of a bee colony to restore damaged DNA structure, (DNA reducing nucleases, 2001). The discovery was awarded with two highest awards of the Russian Academy of Natural Sciences.

TENTORIUM® Group of Companies

The **TENTORIUM® RULAND** is a full-cycle enterprise that processes all known beekeeping products on an industrial scale. It goes from GENTLE SORTING of bee products to the manufacturing of an end products with high consumer value. Every year Tentorium Ruland processes more that 300 tons of bee and phyto products, over 200 tons of honey, over 40 tons of propolis, 5 tones of bee bread and royal jelly and over 6 kg of bee venom.

One of the apiary "**MEDVEZHYA POLYANA**" is located in an ecologically clean place, away from roads and industry. There are over 650 bee colonies with over 20,000-50,000 pollinators.

Pedigree farm "PARASOL" is engaged in breeding of valuable breed of dark northern forest bees, contributing to the restoration of Urals biosystem. In 2014, a laboratory for instrumental fertilization of bees of the Central Russian breed was opened on the basis of "Parasol".

Thermes **TENTORIUM® SPA** - a whole range of services for beauty and health. Here you can undergo healing, cosmetic procedures and exclusive SPA programs. There are 8 sources of its own mineral waters in the center. The most valuable properties of it allows you to get tangible results in improving the body as in the best centers on the Dead Sea.

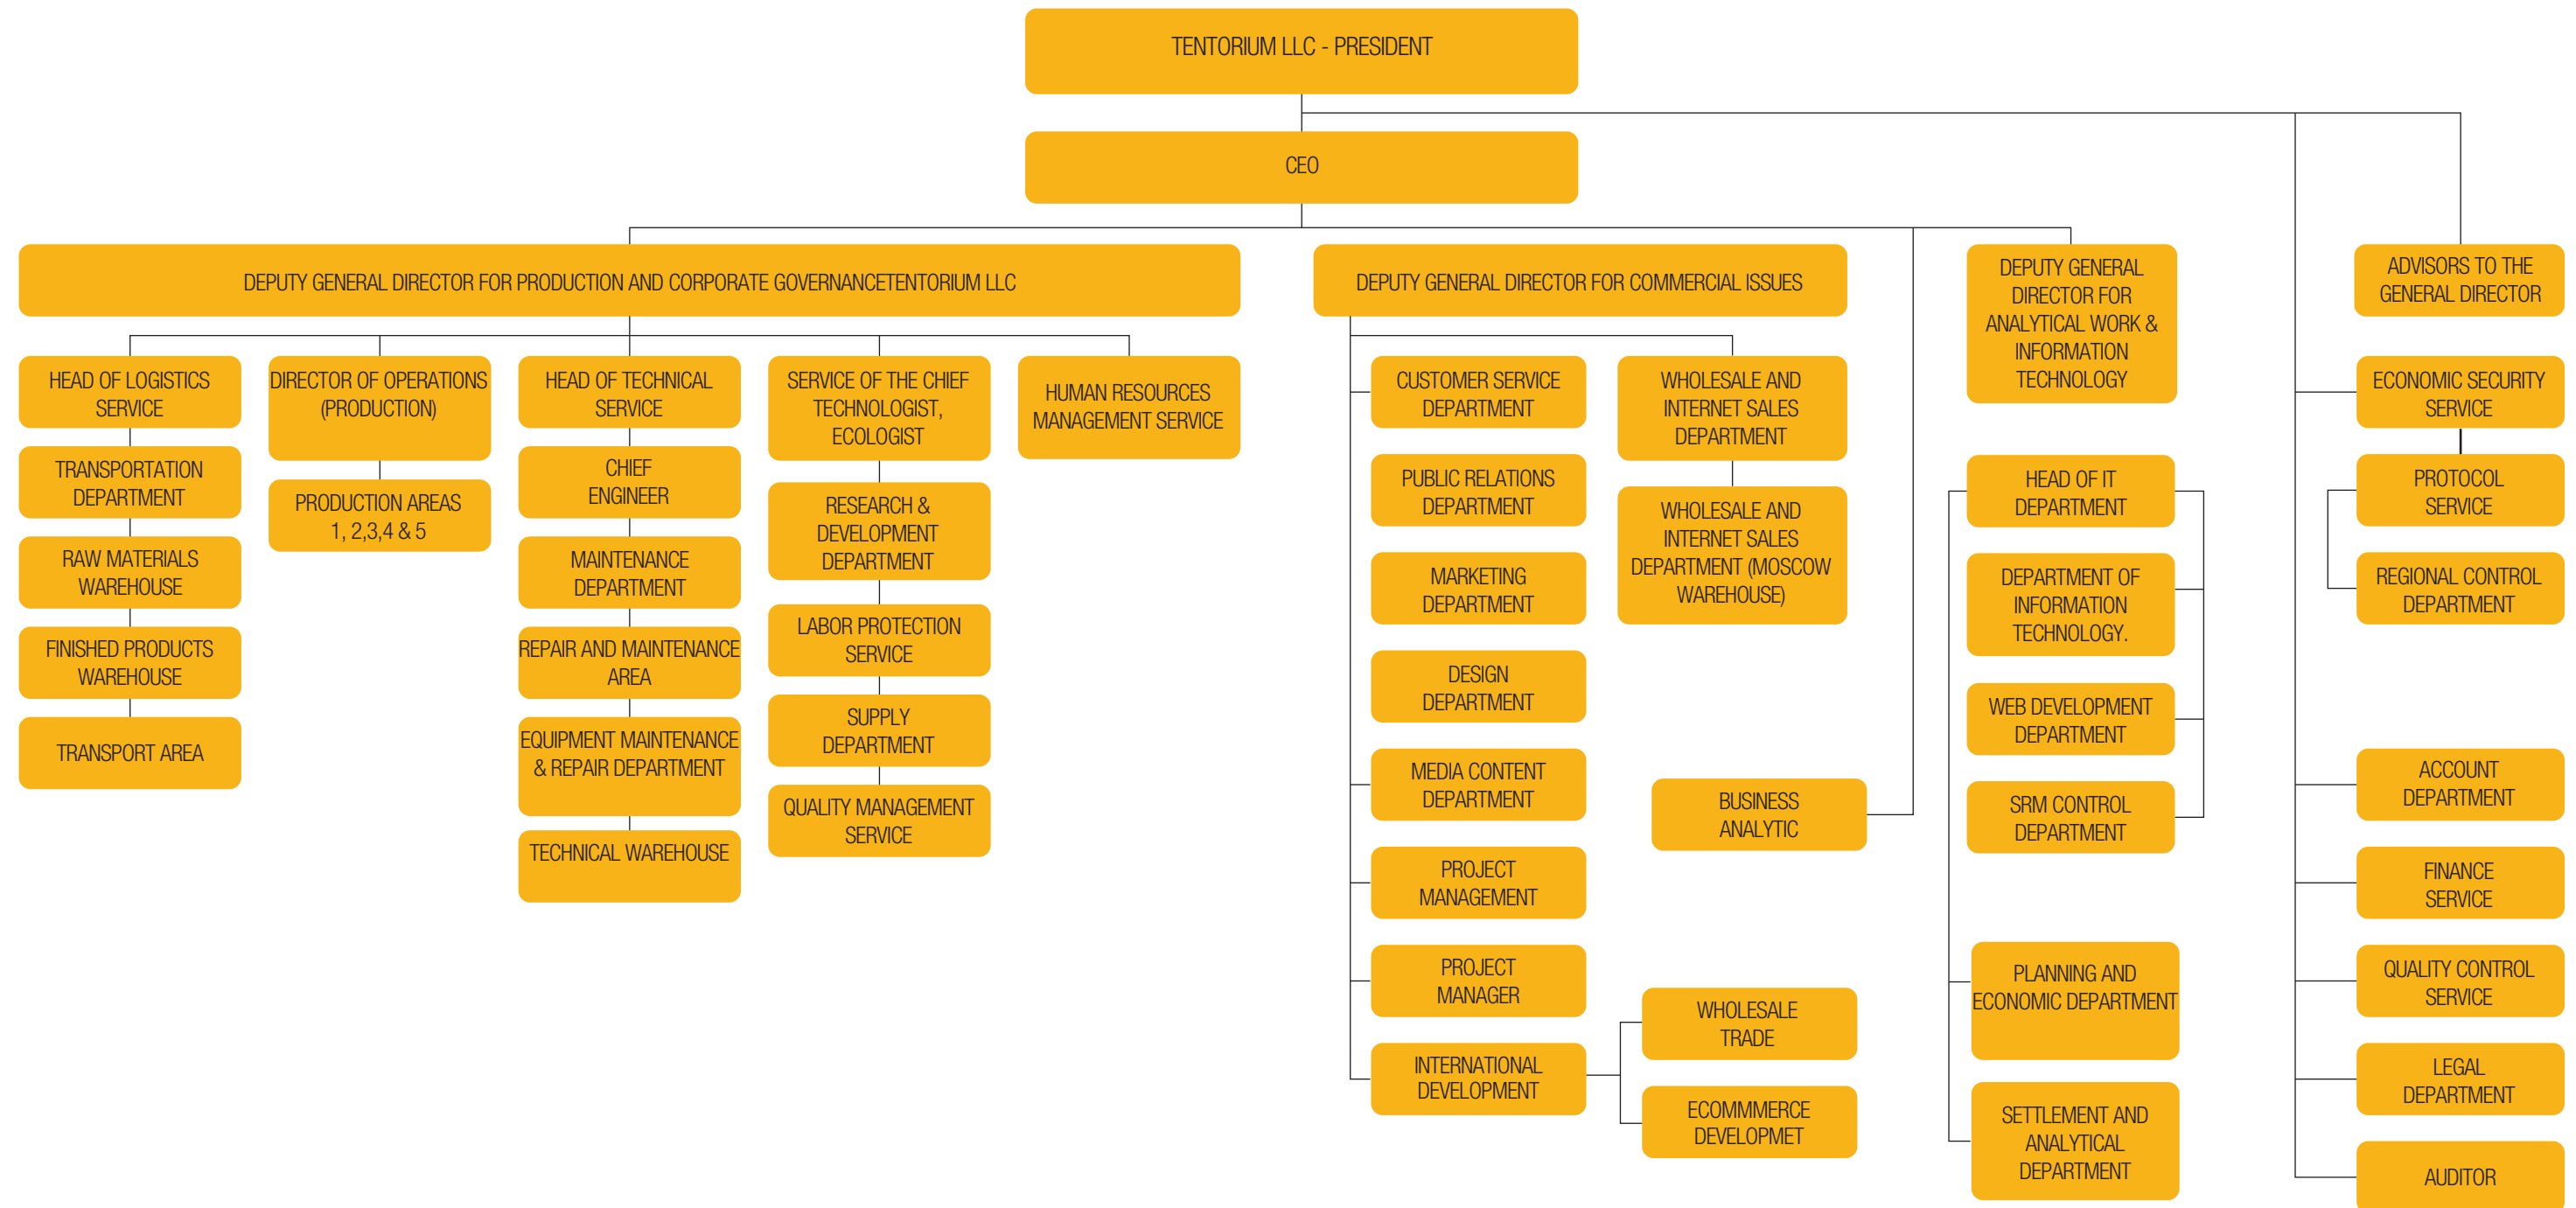

Cheese dairy for the production of goat cheese "**KOZYAYUSHKA**". Alpine, Zaanen and Nubian goat milk from eco-farms of the Perm Region is used for the production of craft cheeses

The **RG BROSS** Studio is a creative tandem of the Khismatullin brothers, a member of the Animated Film Association. The main project is the animated series "Beelography", which helps children to study geography and introduces the history and traditions of different peoples and countries.

TENTORIUM® Structure

TENTORIUM® Ruland

The world's best processing plant.

TENTORIUM® products have an impeccable reputation. Many patents, lots of local and international medals and reward, scientific researches, millions of satisfied clients and grateful reviews is a clear confirmation of this.

TENTORIUM® Ruland

The world's best processing plant complete list of industries*

The plant operates a multi-level laboratory control from raw materials to each unit of finished products, which compiles with HACCP international quality standard, and guarantees the release of products that are safe for humans.

The automated technological process eliminates the human factor. Operators control the the equipment and the sorting of packaged products.

Autonomy and environmental friendliness. To ensure the operation of the enterprise, only gas is purchased. The plant have its own water supply and water treatment system.

Scientific Work

Since the end of the 20th century, TENTORIUM® has been actively involved in scientific work and has funded research studies in the healthy lifestyle industry. The Company has 15 patents for inventions.

“Bee moth farm”. Scientists of the company, together with colleagues, are studying the possibilities of using the components of the enzymes of the bee moth (wax moth) for plastic processing. In the synthesis of components, research can make a great contribution to the preservation of the environment.

Scientific Work

The program for the introduction of bee products into the sport of the highest achievements.

The effectiveness of TENTORIUM® products in the prevention of cardiovascular risk has been clinically proven in four years of research, and a set of products has been patented.

Scientific work was carried out by the Tomsk Medical University and the Federal Research Center of Nutrition of the N.I. Pirogov (Moscow) on the basis of the Ugra boarding school of the Olympic reserve. Based on the research materials, new innovative products TENTORIUM® were created.

In 2018, the Federal Medical and Biological Agency of the Russian Federation included TENTORIUM® products in the official form of products recommended for feeding the national teams of the Russian Federation. Today TENTORIUM® products are supplied to dozens of sports federations including the Olympic Team of Russia.

International Recognition

In June 2021, TENTORIUM cream with bee venom of the Russian company TENTORIUM® entered the TOP-5 of the Best Sellers Rank Amazon in the Cream category. Earlier, Tentorium cream entered the TOP-3 on the Amazon.de platform in the Creams category

In early June, the TENTORIUM® company, within the framework of joint work, at the initiative of the Amazon electronic platform, passed an International Social Amazon audit on the company's compliance with international social standards, safety standards and working conditions.

The company's motto is “Quality and Integrity”. The result of the audit confirmed this: international experts did not reveal any violations. According to experts, compliance with all work standards is a rarity, and violations are detected in 95% of cases.

TENTORIUM[®] CSR

We ensure that we invest in the communities we serve. We want to help them feel their best by uplifting their quality of life. We believe that the resources generated by our business activities must be reflected in the wellbeing of the communities we are active in. TENTORIUM[®] strives to operate as a responsible and a responsive corporate entity that is committed to sustainability. We are passionate about making a measurable impact in all what we do.

We can give faith in a miracle

Since 2004, TENTORIUM® has been providing targeted assistance to young patients at the F.P. Gaaz Children's Oncohematological Center (Perm).

The allocated funds of the Company are used to purchase expensive medications, carry out vital operations, supply gifts for children.

The motto of the program is “We can give faith in a miracle”.

Charity Fund

Charitable Foundation for the revival and preservation of beekeeping traditions "PLANET OF BEES".

The World Charitable Foundation WSBF (Germany) was created in 2009, on the initiative of Rail Khismatullin, which in 2016 was transformed into the Russian charitable foundation "PLANET OF BEES". The foundation has a number of successful projects: the construction of the Bee Protection Wall, eco-lessons, the international children's art competition "Honey Meridian" and "Save the Bee - Save the Planet".
